NBME CAS UX Audit

Prepared by: Maria-Louisa Ching, Digital Marketing Analyst Co-Op, Spring/Summer 2025

Overview: The purpose of this project is to continue efforts to create better user experiences for examinees on the NBME website under the Customized Assessment Services section. Recommendations are based on WCAG 2.1 AA and Plain Language standards, with a focus on enhancing navigation, readability, and inclusivity. Some changes may require technical support or platform-specific development.

Strengths & What's Working Well

Clear Purpose and Audience

- The page is clearly designed for medical educators and decision-makers, using language that aligns with their goals and responsibilities.

Logical Content Structure

- Information is organized in a user-friendly flow: Introduction → Features → Benefits → Testimonials → Call to Action.

Call-to-Action (CTA) Presence

- The "Request a Consultation" button is visible and functional, offering users a clear next step to engage with the service.

Accessibility Awareness

- The page uses readable fonts, strong color contrasts, and a responsive layout that performs well across devices, supporting inclusive access.

Educational Value

- It highlights key selling points such as score reports, exam customization, and performance data which are valuable features for educators seeking flexible assessment tools.

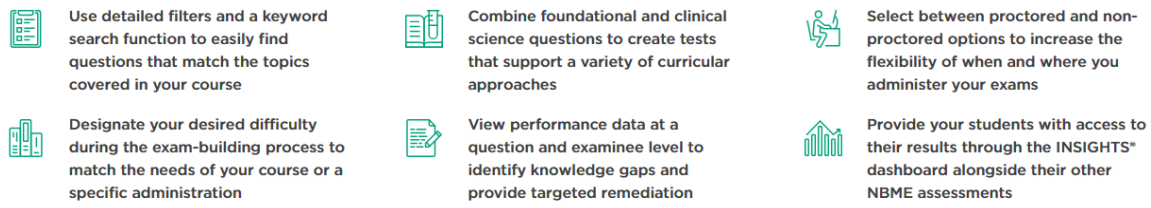

"Customized Assessment Services" Page

Content & Messaging Enhancements

1. **Issue**: The testimonial lacks emotional resonance and specificity. It reads more like a generic statement than a compelling endorsement.
   Recommendation: Include a name, photo, and quote that highlights a specific benefit or transformation.
   Example:
   CAS helped us reduce faculty workload by 30% while improving student performance.

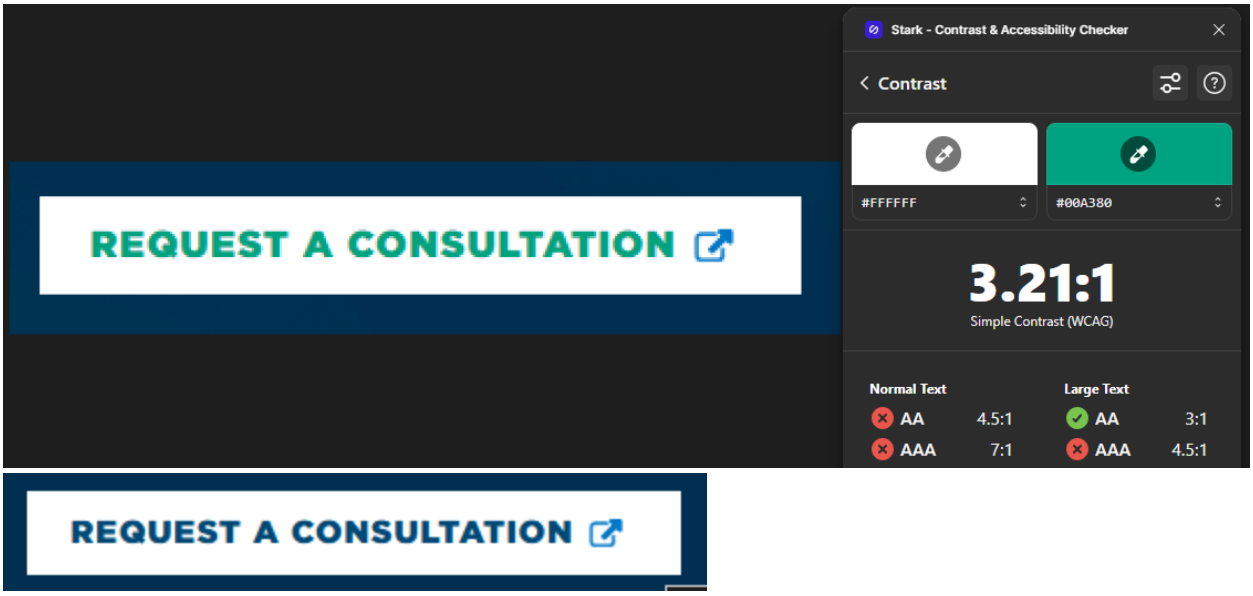

2. **Issue**: Key benefits and features are buried in long paragraphs.
   Recommendation: Use bullet points, icons, and section dividers to break up content and improve scan ability.

Visual & Layout Improvements

1. **Issue**: The page lacks strong visual hierarchy – headings, subheadings, and CTAs blend.
   Recommendation: Use larger font sizes, contrasting colors, and white space to guide the eye. Consider adding section dividers to distinguish content blocks.

2. **Issue**: On hover, the “Request a Consultation” button does not pass color contrast standards.
   Recommendation: Have it match the button under “Ready to Get Started?”’

Conversion Optimization

1. **Issue**: Pricing is buried and lacks clarity.
   Recommendation: Use a pricing table with clear breakdowns and benefits per tier. Consider adding a cost calculator or “Compare Plans” feature.

2. **Issue**: Case studies are mentioned but not visually engaging.
   Recommendation: Present case studies as cards with images, titles, and short descriptions.
